

## Adobe DREAMWEAVER CS4 - Advanced

### 1 Day Course

#### Course Outline

Dreamweaver CS4 is the industry leading website creation tool, enabling users to efficiently design, develop and maintain websites.

#### Who should attend?

Graphic/Web designers, or people transitioning into website related jobs who are already proficient in using Dreamweaver to create and maintain static websites. This advanced course goes beyond the basics and looks at Dreamweaver's more advanced features including creating rich media and dynamic content without having to learn server side applications or database connectivity.

The course on each day runs from 9.30 am to approximately 4.30pm.
